Ä e ä ,~ ä e Barracuda loads the Bilancer 340 or higher models. Page 73 means any form of electronic, verbal or written communication sent to the licensor or representatives of her, including but not limited to a In electronic mailing lists, source code control systems and problem tracking systems operated by, or on behalf of, the licensor for the purpose of discussing and improving the work, but excluding communication marked clearly or otherwise designated in writing by the Copyright Owner as "Not a Contribution". ... Direct Server Return is an option you can choose for any real server. ä e Be able to access all real servers. These two activities are described in the following sections. WAN port of the load balancer without crossing other machines. Prevention To check if the IPS is working on the Barracuda load balancer, there is a simple URL that will generate an IPS test problem. All rights reserved. Al... This behavior is normal. Figure B.1: Barracuda Load Balancer Front Panel for Models 240, 340 and 440 3 4 5 6 7 8 9 Table B.1 Describes the front components on the Barracuda Load Balancer 240, 340 and 440. For example: http://192.168.200.200:8000 To access the admin interface, enter admin for the username and admin for the password. In ... If you would like a copy of the source code or changes to a particular program, we will gladly provide it on a CD for \$100.00. Page 43 Web interface. Every real server must be a jump from the LAN port to the Barracuda load balancer. If you have a service that uses SSL but you do not want the Balancer Load Barracuda to perform the SSL download load, then you need to create a service with the whole port or create two services, one with port 80 (HTTP port) and the other with port 443 (SSL port). No processes should be running when adding systems to the cluster. Advanced> Task Manager and also displays any errors encountered when performing these tasks. B.1: Front panel descriptions for BARRACUDA Load Balance 240, 340 and 440 ... ä e Be the same model as the other Barracuda load budger and the same version of the firmware. Firmware, test with this URL, create or locate a Web Service (with at least one Real Server) on port 80 from the page. 3175 S. The Barracuda Load Balancer determines the order in which the traffic is distributed to the Real Servers based on the policy type for the Service. Energize Update Changes. Page 1 B a r r a c u d a L o a d B a l a n c e r A d m i n i s t r a t o r e Ä Ä Ä s G u i d e V e r s i o n 2 . Page 6 Barracuda Load Balancer AdministratorÄÄÄs Guide... This certificate is used as part of the connection process between client and server (in this case, a browser and the Web administration interface on the Barracuda Load Balancer). Administration Barracuda Load Balancer AdministratorÄÄÄs Guide... Winchester Blvd. Monitoring the Barracuda Load Balancer This section describes the monitoring tasks you can perform from the Web administration interface of the Barracuda Load Balancer. Page 4 A p p e n d i x B e Ä Ä Ä B a r r a c u d a L o a d B a l a n c e r H a r d w a r e .5 7 Front Panel of the Barracuda Load Balancer ...58 Barracuda Load Balancer 240, 340, and 440 . Basic > Services Set the Enable Session Directory Integration option to Click Save Changes Note that Session Directory Integration does not work if the Barracuda Load Balancer is in Bridge- Path mode. Click Save Changes Scheduling Policies The Barracuda Load Balancer considers the weight values for the Real Servers and then applies a scheduling algorithm, either Weighted Round-Robin or Weighted Least Connections, to determine which Real Server gets the next connection. Figure B.3 shows the back components as described in Table B.3. Figure B.3: Barracuda Load Balancer Back Panel Table B.3 describes the back components on all models of the Barracuda Load Balancer. Static routes for incoming and outgoing traffic for each IP address of each Real Server have been defined.
